

Warm-up:

• Listen to "The Last Human Light" pg 61

1. Write down thoughts for discussion.

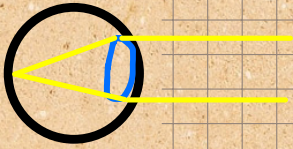

• Camera vs. the eye:

↳ difference has to do with focusing

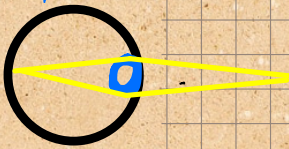

↳ Camera: changes the distance between the lens & the receiver

↳ human eye: retina changes the thickness & shape of your cornea

Distant

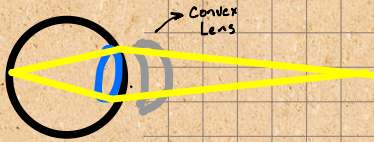

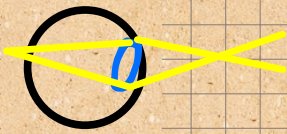

Near

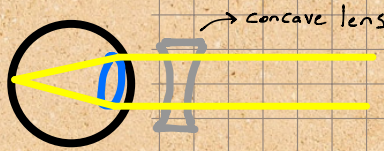

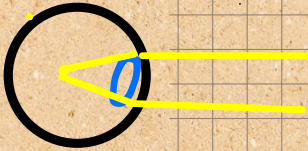

Eye Defects:

• Farsighted: can only see objects in the distance

• Nearsighted: can only see objects up close

• Astigmatism: cornea is curved more in one direction than the other
